Horus ePortfolio update – January 2019

Contents

Summary

- First 'business as usual' year started and continues well
  - National F1 induction survey showed that familiarity with the ePortfolio is the highest recorded at 65%!
- Four big new features/enhancements developed and released
- Archiving: Data from NES ePortfolio (out of synch 17-18 FDs only) migrated to the HEE system

Achievements between August 2018 and January 2019

- Horus features released
  - e-LfH - import of all courses completed (not just "Foundation (FND)")
  - Download portfolio (for FDs/NTGs)
  - PSG feedback collection overhaul
  - Concerns labelling and management
  - Smaller features:
    - Auto-pop up when a CS who is also an ES completes either a CS end of placement report or an ES end of placement report reminding them to complete the other one as well (if they haven't already)
    - Auto-email to a user when their location/access type permissions are changed
    - List of all your current location/access type permissions on "My account details" page
  - E-portfolio timeline for trust and HEE admin staff published on Support Site
- HEE FP E-portfolio Archive
  - Data for out of synch foundation doctors who used NES ePortfolio during 2017-18 was successfully migrated and made available to end users at the end of November 2018.
  - We had planned to make this data set available by mid-September – delays were caused by unforeseen technical complexities. All data have been migrated intact.

Setbacks between August 2018 and January 2019

- Horus experienced its first unplanned downtime on the weekend of 27-28 October 2018. The site was back up by 10:00 on Monday 29 October.
  - The downtime was due to an issue at HEE's cloud service provider, Azure. We have investigated with them and are confident that the Horus set up is robust and secure.
- Some administrators are finding the Horus rotation management process unclear.
  - There are a number of incorrectly configured rotations on Horus for out of synch FDs/those whose time in a training grade has been extended. *This causes significant issues at ARCP for the FD in question.*
  - Guidance is available on our support site.
  - Any user who notices a similarly incorrectly configured rotation should contact us – we will help to correct the data.
  - We are working on ways to improve the process to help guide administrators more clearly.

Plans for January-March 2019

- PSG feedback "summary"
- Portfolio download – add more 'complex' forms (eg TAB summary, PSG summary)
- Clear backlog of smaller high priority jobs
- Add more on-screen admin reports

- Features to enhance curriculum 'viewability'
- Archive "NW Horus" (the previous version of Horus)
- National foundation e-portfolio user group ("TAG") – 30 January 2019
- Prepare for any updates that may be needed for ARCP 2019
- Prepare to contribute e-portfolio data to the UKMED database

Queries

If you have any queries or suggestions about HEE Horus, please contact us or browse previous updates and newsletters.
