Introduction

The Foundation e-Learning Programme is a free e-learning resource for foundation doctors. It is designed specifically to support the foundation curriculum (FP Curriculum (2016)) and is approved by the UKFPO. The material has been developed by the Academy of Medical Royal Colleges in partnership with e-Learning for Healthcare (e-LfH) and many other colleagues.

Search for the programme “Foundation (FND)” once you have logged in to your e-LfH account.

These interactive sessions of e-learning are designed to enhance and blend with the existing teaching provided by local education providers. The sessions use high quality graphics, video, animation and interactive exercises. They provide learning objectives and are mapped to specific outcomes.

This document lists the modules that have specifically been designed to support each foundation professional capability (syllabus outcome) as a guide for foundation doctors.
